2.2 Archer Platform Solutions - Governance, Risk & Compliance (GRC)

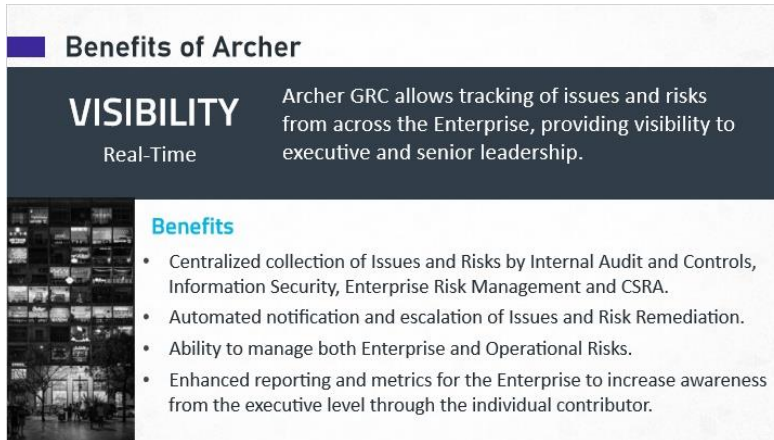

Notes:

The RSA Archer GRC Platform provides a common foundation for managing

policies, controls, risks, assessments, and deficiencies across the Enterprise.
Here are the five major solution areas of the Archer platform:

2.3 Benefits of Archer

Benefits of Archer

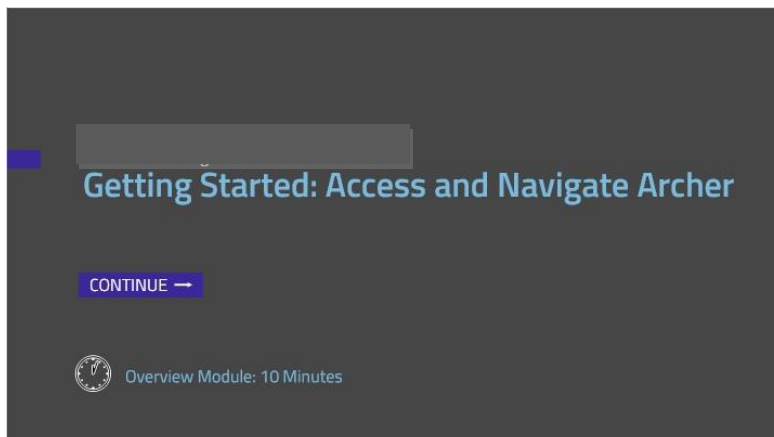

VISIBILITY
Real-Time

Archer GRC allows tracking of issues and risks from across the Enterprise, providing visibility to executive and senior leadership.

Benefits

- Centralized collection of Issues and Risks by Internal Audit and Controls, Information Security, Enterprise Risk Management and CSRA.
- Automated notification and escalation of Issues and Risk Remediation.
- Ability to manage both Enterprise and Operational Risks.
- Enhanced reporting and metrics for the Enterprise to increase awareness from the executive level through the individual contributor.
